FOREWORD

External Trade Reports for 1980 and 1981 contained statistics on exports laden in British Columbia and estimates of exports of products of British Columbia origin, in addition to detailed information on all commodities imported and exported through British Columbia customs ports. Because of budgetary constraints, the 1982 report was reduced in scope and covered only trade through British Columbia customs ports. However, to compensate for the reduction in content, all exports and imports through British Columbia customs ports were included. In the past, all commodities of less than $75,000 had been excluded. This report is identical in both format and coverage to the 1982 and 1983 editions.

British Columbia regularly sells 55-60 percent of the value of Provincial commodity production in foreign markets. Recognition of the need for adequate statistics and analysis of the Province's external trade has, over the years, resulted in development of a wide range of foreign trade statistics and reports by this Ministry. A series of publications on market prospects in countries of the Pacific Rim and the annual publication, "External Trade Through British Columbia Customs Ports" have been given extensive distribution. In addition, special detailed estimates of the value of British Columbia product exports are prepared each year and a summary is published annually in the Ministry of Finance's "Financial and Economic Review". Other publications of the Ministry containing trade statistics are the annual "British Columbia Industry Review" (formerly "British Columbia Economic Activity - Review and Outlook"), and "British Columbia Facts and Statistics".

Inquiries related to the information appearing in this report, or other inquiries concerning the external trade of British Columbia, should be addressed to:

DETAILED TABLES

7 Exports Through British Columbia Customs Ports, 1984, by each commodity and country. Those commodities marked with an asterisk in the class number column are considered to be principally of British Columbia origin 1
8 Imports Through British Columbia Customs Ports, 1984. Table lists imports of foreign products, by commodity and country . 63

SUMMARY

This report provides detailed import and export statistics of all commodities traded through British Columbia customs ports. Also included are summary tables, graphs, and other analytical information.

The criteria for designation as a product traded through B.C. customs ports is clearance at a Canadian customs port within the borders of British Columbia. Customs ports are located at airports, sea ports, and at U.S. border points, and at other specified locations. Products imported or exported on all modes of transport are cleared at these customs centres. Information from customs documents is used by Statistics Canada to designate the product as cleared through a specified province or region.

Export statistics on trade through B.C. customs ports provide data on all Canadian products cleared through customs ports in B.C. regardless of where in Canada the product was laden for export or where in Canada the product originated. Products previously imported into Canada and re-exported are not included in these statistics.

Imports cleared through British Columbia customs ports are not necessarily consumed in British Columbia and may be forwarded to other Canadian provinces. These statistics do not include products consumed in British Columbia which were imported into Canada through other Province's customs ports.

B.C. customs port data is useful in economic analysis, indicating possible import substitution opportunities and export opportunities in foreign markets. Shippers and transportation firms can also use both import and export data as an aid in assessing trends and patterns in shipments through B.C. customs ports.

Statistics Canada publications (Catalogue Number 65-001, 65-003, 65-004, 65-007, 65-202, 65-203, 65-207) include information on the products imported and exported through all Canadian customs ports.

As already noted, export and import statistics shown are derived from information collected and tabulated by the Federal Government. Detailed information as to coverage and classification revisions of these statistics can be supplied on request, or can be found in the explanatory notes printed in the monthly "Trade of Canada" reports (Catalogue No. 65-004, 65-007) published by Statistics Canada, Ottawa. A simplified version of these explanatory notes appears on page S-16 of this report.

THE TEN LEADING COMMODITIES EXPORTED

THROUGH BRITISH COLUMBIA CUSTOMS PORTS 1983, 1984

Commodity	Value of Exports 1983 ($ million)	% of Total	Value of Exports 1984 ($ million)	% of Total
Natural gas	2,147.2	13.7	2,016.1	11.1
Coal	1,151.1	7.3	1,784.4	9.8
Red spring wheat, except seed	1,557.9	9.9	1,575.6	8.6
Wood pulp, bleached kraft papergrade, softwood	975.7	6.2	1,193.1	6.5
Sulphur, crude or refined, n.e.s.	509.4	3.3	703.0	3.9
Lumber, western hemlock and amabilis fir	645.0	4.1	658.6	3.6
Newsprint paper	570.5	3.6	657.2	3.6
Rapeseed	411.0	2.5	610.1	3.3
Potassium chloride, muriate	377.6	2.4	515.9	2.8
Aluminum pigs, ingots, shot, slabs, etc.	415.2	2.7	414.9	2.3
Total above commodities	8,760.6	55.8	10,128.9	55.5
Total all commodities	15,691.2	100.0	18,252.6	100.0

The total value of goods exported through British Columbia customs ports in 1984 was $18,252.6 million, up 16.3 percent from 1983. Declines in shipments of natural gas and aluminum were more than offset by gains in other commodities. Coal showed the largest advance with an increase of $633.3 million or 55 percent. The ten leading commodities were valued at $10,128.9 million compared with $8,760.6 million in 1983.

Forest products among the top ten exports had a value of $2,508.9 million in 1984 compared with $2,191.2 million the previous year. Products of the mineral industry in the top ten were valued at $5,434.3 million compared with $4,600.5 million in 1983, an increase of 18.1 percent.

EXPORTS Cont'd.

Other products shipped through British Columbia customs ports having a value of $25 million or over were: cattle, n.e.s., weight over 700 lbs.; pork, fresh or frozen, n.e.s.; salmon, coho, frozen, whole dressed; salmon, spring, frozen, whole dressed; salmon, pink, canned; herring roe, fresh, frozen, or cured; rye; Alberta winter wheat, except seed; barley; wheat, except seed n.e.s.; malt flour; alfalfa, dehydrated; cattle hides, raw; flaxseed; logs, Douglas fir; logs, hemlock; logs, spruce; pulpwood chips; copper in ores, concentrates, and matte; gold in ores and concentrates; silver in ores and concentrates; molybdenum in ores, concentrates, and scrap; crude petroleum; asbestos milled fibres, group 4 and 5; lumber, yellow cedar; lumber, cedar, n.e.s.; lumber, sitka spruce; lumber, Douglas fir and western larch; lumber, spruce, jack pine, fir, n.e.s.; cedar siding; shingles, western red cedar; shakes, western red cedar; plywood, Douglas fir; plywood, softwood, n.e.s.; wood pulp, dissolving and special alpha; wood pulp, sulphate, semi-bleached; wood pulp, sulphate, unbleached, papergrade; wood pulp, mechanical, unbleached; wrapping paper, unbleached, sulphite/sulphate; wood pulp, bleached kraft paper grade, hardwood; groundwood printing paper, n.e.s.; liner board; tallow; rapeseed oil; acylic hydrocarbons and their derivatives; alcohols and their derivatives; urea; plastic and synthetic rubber, not shaped, n.e.s; butane gas, liquefied; propane gas, liquefied; gasoline; fuel oil no. 1-3, stove, furnace, light; fuel oil, n.e.s.; nickel anodes, cathodes, ingot, rod, shot; zinc blocks, pigs, and slabs; electricity; cars, 110-120 cubic feet, interior volume; cars 120 cubic feet and over, interior volume; station wagons, new; trucks and chassis, not over 6000 lbs.; trucks and chassis, commercial, n.e.s.; parts and accessories for motor vehicles; aircraft assemblies, equipment and parts; card punch sort tabulating computers and parts; contractor's equipment and tools; shipping containers, glass, and parts.

The export statistics supplied in this table and in the rest of this publication are only for products shipped through British Columbia customs ports irrespective of the province of origin. It should be noted that the statistics in this report do not include exports of British Columbia origin which leave Canada via other provinces' customs ports. The bulk of such exports are shipped by rail to the central and eastern regions of the United States.

THE TEN LEADING COMMODITIES IMPORTED THROUGH BRITISH COLUMBIA CUSTOMS PORTS 1984, AND 1983 COMPARISON

Commodity	Value of Imports 1983 ($ million)	% of Total	Value of Imports 1984 ($ million)	% of Total
Cars, new, all types	1,055.7	16.4	1,428.8	18.3
Trucks and chassis, new, highway	226.9	3.5	254.2	3.3
Electronic computers and parts	164.8	2.5	213.3	2.7
Tape players, tape recorders, except parts	141.6	2.2	213.2	2.7
Parts and accessories for motor vehicles, n.e.s.	107.0	1.7	193.5	2.5
Alumina	102.2	1.6	135.3	1.7
Coffee, green	89.5	1.4	97.7	1.2
Motorcycles	83.1	1.3	71.5	0.9
Truck and bus tires, pneumatic, new	43.8	0.7	70.1	0.9
Phosphate rock	53.8	0.8	64.7	0.8
Total above commodities	2,068.4	32.1	2,742.3	35.0
Total all commodities	6,450.1	100.0	7,827.1	100.0

Imports through British Columbia customs ports in 1984 were valued at $7,827.1 million, 21.4 percent more than in 1983, but still $126.4 million less than in 1981.

Automobiles and trucks continue to dominate import statistics, together accounting for more than one-fifth of the total value of goods moving directly into the Province from other countries.

IMPORTS Cont'd.

Other imports valued at $20 million and over were: salmon, fresh or frozen; salmon, canned; shrimps and prawns, fresh or frozen; oranges, mandarines, tangerines, fresh; orange juice concentrates, frozen; coffee, roasted or ground; grape wines, still, table; crude natural rubber, except latex; precious metals in ores, concentrates, and scrap, n.e.s.; zinc in ores, concentrates, and scrap; lumber, Douglas fir; fuel oil, n.e.s., heavy fuel oil; wire rods, steel, hot rolled; plates, carbon steel, 60-100 inches; well casing, new; pipes, carbon steel; wheel tractors, new, n.e.s.; tractors, n.e.s, and tractor parts and accessories, n.e.s.; excavator-type cranes, shovel, power; motor vehicles, n.e.s.; aircraft assemblies, equipment, and parts; commercial communication equipment, n.e.s.; telephone apparatus, equipment, and parts; insulated wire and cable; TV receiving sets, color, under 19 inches; TV receiving sets, color, over 19 inches; microwave ovens; combination radio-phonograph sets; electronic measuring and testing instruments, n.e.s.; athletic footwear, n.e.s.; magazines and periodicals, n.e.s.

It is pointed out that all imports through British Columbia customs ports are not necessarily consumed within the Province; likewise, many foreign products consumed in British Columbia enter Canada through other provinces' customs ports.

---

[1] Includes all Canadian products exported through British Columbia customs ports, irrespective of province of origin.

[2] Includes all foreign origin exports not included elsewhere in this report.

[3] Includes all products imported through British Columbia customs ports, irrespective of province of destination.

[4] Subject to revision.

EXPLANATORY NOTES[1]

Export statistics shown in this report were derived from Revenue Canada customs documents collected and tabulated by the International Trade Division, Statistics Canada, Ottawa. (See also "Introduction".) Commodity and country classifications used are identical to those found in Statistics Canada, "Trade of Canada" publications (Catalogue 65-001, 65-002, and 65-202). Classification details are found in Catalogue 65-502E "Canadian International Trade Classification", Revenue Canada and Statistics Canada.

Concepts and Definitions Used in External Trade Statistics

The most comprehensive set of principles for the compilation of trade statistics is to be found in International Trade Statistics: Concepts and Definitions, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes summarize these principles as they pertain to Canada's external trade statistics.

System of Trade: Canadian statistics are tabulated according to the "general" system of trade. Thus imports include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses).

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

Weight, where shown, is the net weight of the goods; that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the customs tariff.

---

[1] Source of information - Statistics Canada - Summary of External Trade, Cat. No. 65-001 and other trade publications.

The "tons" used here are 2,000 pounds, and "cwt" means 100 pounds. "Cwtad" means "100 pounds air-dried". Where other units of quantity are used, Imperial standards apply. Conversion factors to metric units of measurement are published in Trade of Canada publications, (e.g. Catalogue 65-004).

In this report are trade items such as "Engines and Parts" which show both quantities and values. In the item "Engines and Parts", the quantity represents the number of complete engines only, while the value represents not only the value of the specified number of complete engines, but also the value of all kinds of "Parts" of engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

The letters "n.e.s." mean "not elsewhere specified".

Coverage: Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.

Valuation: Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm, or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

Imports are generally recorded at the values established for Customs duty purposes according to the the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are, however, purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

Trading Partner Attribution: The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the Government of Canada on international issues of recognition, sovereignty, or jurisdiction.

Exports are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepot points, particularly in Europe, for re-export to the ultimate destination which is unknown when the goods leave Canada.)

Imports are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "swap oil" from the United States which is credited to this country.

Provincial Detail: Export statistics by province of lading indicate the province in which the goods were first laden aboard a carrier for export, which may not in all cases represent the province in which the goods were grown, extracted, or manufactured. Import statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate counsumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.
